C-DAC Thiruvananthapuram

PROJECTS

Agriculture Information Management system and Soil Prediction 2022
The agriculture information system and soil prediction aim to enhance agricultural practices by providing data driven insights and predictions .

The Online Auction System 2021
An online auction project that holds online auctions of various products on a website and serves sellers and bidders accordingly. The system is designed to allow users to set up their products for auctions and bidders to register and bid for various products available for bidding.

Manipulated Image and Video Detection 2023
Video and image manipulation become a major concern in recent years due to the widespread use of digital media and advances in editing software.

SIGN UP! 2024
This project is a Flutter application that demonstrates a simple login functionality using a SQL database for user authentication.

Modelshop work flow management(MS Flow) present
workflow management system designed for Modelshop. The web platform is developed using Node.js, React, and PostgreSQL, ensuring a robust and scalable backend. The mobile application is built with Flutter.

Pet adoption app design 03/2025
The Pet Adoption App provides a simple and user-friendly interface for pet lovers to browse and adopt pets. The app features a **Login Page** for secure access, a **Forgot Password Page** for password recovery, and a **Profile Page** where users can manage their details and adoption history.

Task mangement app design present

 Login Page – A simple and modern sign-in screen with input fields for username and password, a "Forgot Password?" option, and a login button.
 Forgot Password Page – A reset password screen with fields for username, new password, and re-enter password, along with a "Reset Password" button.
 Profile Page – Includes a sidebar menu for easy navigation, displaying user profile details and essential menu options such as **Dashboard, Tasks, Settings, and Logout**.
