Objective

Aspiring full-stack developer with hands-on experience in Flutter, Node.js, PostgreSQL, and React. Passionate about solving real-world problems through scalable software solutions. Eager to work in a collaborative, innovation-driven environment where I can continue learning and contributing to meaningful projects.

Education

University College of Engineering, Thodupuzha	<i>2021 – 2024</i>
B.Tech in Computer Science and Engineering	CGPA: 7.38
Carmel Polytechnic College, Alappuzha	<i>2018 – 2021</i>
Diploma in Computer Science and Engineering	CGPA: 8.1
VHSS Muthukulam	<i>2017 – 2018</i>
SSLC	98%
VHHSS Muthukulam	<i>2016</i>
Higher Secondary (Science)	78%

Experience

Graduate Apprentice *C-DAC, Thiruvananthapuram — Present*

- Worked on real-time job and workflow tracking systems using Flutter and Node.js
- Contributed to backend API development and PostgreSQL schema design for internal tools
- Collaborated with a development team for UI/UX enhancements using Figma

Projects

Modelshop Workflow Management (MS Flow)

Node.js, React, PostgreSQL, Flutter

- Developed a job tracking and task status management backend using Node.js and Express
- Built cross-platform mobile frontend in Flutter
- Implemented PostgreSQL schema for control number-based part/task tracking

SIGN UP! – Flutter App

- Built a user authentication system using Flutter and a SQL database
- Implemented login, reset password, and form validations

Manipulated Image and Video Detection

- Explored deep learning-based detection of image/video tampering
- Implemented preprocessing and detection pipeline for real-world media integrity validation

Online Auction System

- Designed a full-featured web application for bidding and auction management
- Integrated bidder/seller login, product listings, and real-time bidding

Agriculture Information Management System and Soil Prediction

- Built a web-based dashboard for managing farm info, soil data, and crop recommendations
- Integrated predictive models for soil classification

Pet Adoption App Design

- Created UI designs for login, profile, and password recovery using Figma
- Focused on user experience and intuitive navigation for pet lovers

Task Management App Design

- Designed task status flows with reset and recovery functionality
- Built UI/UX mockups for sign-in and password reset features

Technical Skills

- **Languages:** Python, Java, SQL, HTML, Shell Script
- **Frameworks/Tools:** Flutter, Node.js, Express.js, React, Bootstrap, Figma
- **Databases:** PostgreSQL, DBMS
- **Others:** GitHub, Firebase, REST API Design, Linux
